

GETTING STARTED

STANDARD PACKAGE

- OASIS modules and hardware for installation on 2"x2" tubing
- Variable-speed AC gear motors
- Control panel with included color touchscreen
- Installation guide
- Sunlight-resistant cabling for motors, switches, and valves to help simplify wiring installation
- Free on-call tech support

What to Expect

- Frees up grower time and provides peace of mind that baskets are intelligently watered
- Reduces water by up to 50% by giving each basket only the water it needs
- Creates a uniform and consistent crop
- Saves on chemical usage
- Controlled and monitored using the color touchscreen or remotely using a smartphone, tablet, or computer

Added Benefits

- Makes shipping easier by having all baskets ready at the ideal shipping weight at the same time
- Can be used as an inventory tool by displaying the number of baskets on a line via the touchscreen
- Reduces waste and negative impact on other greenhouse crops and the environment
- Assists in environmental certifications through state, national, or global organizations
- Comes with a one-year parts warranty

1. Let's Talk

Share details about your greenhouse and needs, and we'll discuss what OASIS configuration makes the most sense. We'll send you a custom quote and OASIS specifications tailored to your unique situation.

2. Installation

Once you've ordered your system, you can follow our easy step-by-step guide included with the product and then work with our team directly to program your lines for the ideal basket weight for your specific crops.

3. Evaluation

See the savings and benefits add up as you go through your season with OASIS. Adjust the program as necessary to achieve your highest quality crop of hanging baskets yet.
